

**First Person on Scene (FPOS)
Intermediate (Plus Extended Skills)
Remote & Tactical Medicine**

This course is designed to take the First Aider on to the next skill level, students will be taught the skills associated with rapid assessment, stabilisation and transfer of both the trauma victim and those suffering a medical emergency. It is aimed at those working in high risk and hostile environments – it is ideal for remote medics, Close Protection Operators and Ships’ Anti-Piracy Teams. FPOS is fully recognized by the Security Industry Authority.

The first three days of the course are FPOS which is approved by Edexcel and is IHCD managed. The additional two days are for those requiring extended skills. The training includes both theoretical lectures and practical sessions, designed to develop a good, all round Tactical First Responder.

Oxygen Therapy

Realistic Scenarios

RTA Scenario
